IMPORTANT INFORMATION

Specifications, information and products featured in this catalogue are subject to change.

Contact us for up to date information.

Products displayed are not actual size and the logos used are for reference only to illustrate branding options. They are the property of their owners and represent no endorsement of this brochure or its content.

Product colours illustrated are matched as closely as the print process will allow and should be considered to be approximate.

Actual product colours can also vary from shipment to shipment and this is beyond our control. Always ask to see a sample to ensure the product colour and the product itself are suitable for the intended purpose as we do not accept returns due to minor colour variations or the product being deemed unsuitable once it is delivered.

REUSABLE COFFEE CUPS

for positive and practical promotion

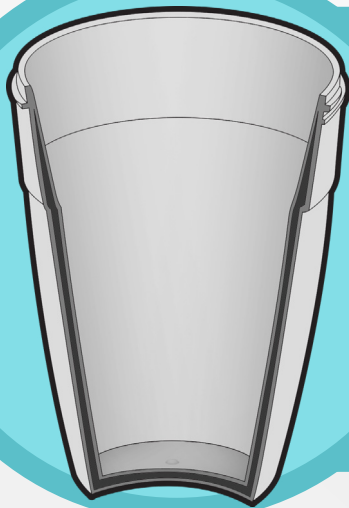

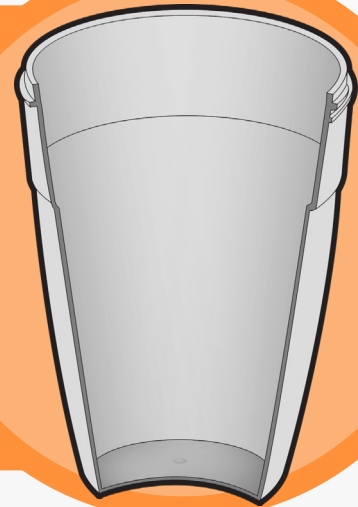

It is estimated that Australia and New Zealand use over 1.2 billion disposable coffee cups each year. Most of these cups end up in landfill as the plastic lining renders the cups difficult to process and recycle. The demand for alternatives to disposable, single use cups has meant that thousands of cafes, businesses and individuals are making the move to reusable coffee cups. This makes them an increasingly popular promotional item and a practical way for brands to send a positive message.

COFFEE CUP CONSTRUCTION

choosing the right cup for your promotion

SINGLE WALL

Single wall cups are an affordable, lightweight and compact coffee cup option. A heat resistant silicone or cork band ensures the cup is comfortable to hold and provides a perfect branding opportunity.

DOUBLE WALL

Coffee cups with double wall construction are an economical way to insulate your beverage. The cup is designed to trap air between an internal and external wall. Air has excellent insulation properties and reduces the rate of temperature change. The outside of the cup remains comfortable to hold and there is no messy condensation from cold drinks.

VACUUM INSULATED

When it comes to maintaining drink temperatures, it's hard to beat a vacuum insulated cup. Double wall vacuum construction provides the ultimate insulation and maintains the beverage temperature for hours. These cups have the same construction as double walled cups but air is removed from between the two walls to create a vacuum. A vacuum reduces the rate of temperature change significantly, keeping the outside of the cup cool and preventing messy condensation from cold drinks.

BRANDING OPTIONS

Pad Print

Pad Printing uses a silicone pad to transfer an image to a product from a laser etched printing plate. It is one of the most popular, fast and affordable ways of branding products due to its ability to reproduce images on uneven or curved products and print multiple colours.

Screen Print

Screen Printing is achieved by forcing ink through a fine mesh screen onto the product which is ideal for cylindrical objects. This branding option allows for larger branding areas and is perfect for bold artwork, letting your brand shine through.

Laser Engraving

Laser Engraving uses a laser to permanently etch artwork into a product. Different materials produce different effects when engraved, such as shiny steel or natural etch. Laser engraving is a stylish way to elevate and add value to your brand.

BRANDING OPTIONS

Silicone Debossing

Debossing makes an impression of the artwork into the product. The brand becomes part of the product, permanent and dishwasher safe, keeping your brand in the public arena for longer. This is a sophisticated way to present your brand and has a higher perceived value than other forms of branding.

Silicone Digital Print

Silicone Digital Print is the pinnacle of branding on silicone, allowing for vibrant, full colour, high resolution artwork. Large print areas allow for maximum branding opportunities and the finished prints are vivid, eye catching and durable.

Sublimation Print

In Sublimation Printing, a transfer is produced by printing sublimation ink onto transfer paper and heat pressing it onto the product. Sublimation ink is a dye so there is no ink build-up on the product and the brand becomes a more permanent part of the product. This branding method is perfect for producing full colour wrap around prints that really stand out.

Choose any colour combination from the standard colours at no extra cost.

Express Cup Claritas - 350ml

115012

Crystal-clear 350ml reusable coffee cup with a heat-resistant silicone band and a secure screw on lid with a splashproof flip closure. IdealCup - 355ml

121298

Designed to reduce waste caused by single-use cups and lids, IdealCup is the first reusable coffee cup to be conceptualised and manufactured in New Zealand. This 355ml cup is manufactured from BPA-free polypropylene and features ergonomic fins around the cup to disperse heat, allowing the cup to be carried comfortably on the go. IdealCup's secure lid is manufactured from BPA-free polyethylene and sports a smart rotating sipper plug to ensure there are no leaks or spills. IdealCup is proud to have achieved the rigorous Environmental Choice New Zealand (ECNZ) tick of approval for their reusable cup – one of only two manufacturers in New Zealand to be granted the certification. Both the cup and lid use plastics that are made in New Zealand. IdealCup has a strong ethos surrounding their product, using effective product stewardship to ensure the IdealCup creates as little waste as possible. While each IdealCup is designed for a lifetime of reuse, every IdealCup can be returned to IdealCup HQ at the end of its life to be ground down and repurposed into new IdealCup products. The cup and lid can be mixed and matched in any colour combination from the available colours at no extra cost. Up to five different colour combinations are included in the price and more are available for an additional charge. The IdealCup logo is moulded into the lid and the base of the cup. Please note that this product cannot be supplied unbranded or without the IdealCup branding and handwashing is recommended.

- Pad Print

Choice Cup

113586

Double wall, 300ml reusable coffee cup which will keep drinks hot for longer and remain comfortable to hold. It has a secure push on lid with a splashproof sliding closure. Choice Cup has an incredible story to tell and is manufactured from a 50/50 blend of natural rice husk fibre and polypropylene which is shatterproof, odour-resistant and BPA-free. Rice husk is a waste product with little value and the agricultural industry often dispose of it by burning which creates air pollution. Using it to make Choice Cup reduces the amount of plastic and produces a trendy natural look. This product is not dishwasher safe and handwashing is recommended.

Branding Options:

- Pad Print

Choose any colour combination from the standard colours at no extra cost.

Stellar Cup Borosilicate - 250ml

120946

Elegant 250ml reusable borosilicate glass coffee cup with a secure push on plastic lid with silicone seal and a wide heat-resistant silicone band.
